Emerald Harvest

From Iran's High Orchards to the World

COMPANY PROFILE & PRODUCT CATALOGUE

OUR STORY

From One Orchard. To the World.

Emerald Harvest was founded on a simple conviction: the world deserves to know what Iranian pistachios truly taste like when grown, sorted, and shipped with uncompromising care. What began as a single partnership with Kerman growers has grown into an integrated export operation.

We do not broker pistachios. We grow them, sort them, pack them, and deliver them, owning every link in the chain so that no quality compromise can hide between handoffs. Our buyers return not because of price alone, but because the product is always exactly what we said it would be.

"Authenticity is not a marketing claim at Emerald Harvest. It is an operational standard."

VALUES & VISION

01

Quality

We refuse to ship what we would not eat ourselves. Every kernel has earned its place.

02

Transparency

Lot traceability and full documentation are shared proactively, not on request.

03

Innovation

Traditional orchards, modern technology. We invest in both so neither compromises.

04

Sustainability

Water-efficient irrigation and packaging that reduces our footprint season by season.

WHAT WE DO

Orchard to Export Every Step Ours.

01

Harvest — Orchard to Hand

Our growers in Kerman's high-altitude orchards hand-pick at peak ripeness each autumn.

02

Processing — Precision Sorting

Optical and mechanical sorters remove shells and foreign matter for clean, consistent product.

03

Quality Control — Lab-Verified Grade

Every lot is tested in-house and by third parties for aflatoxin, moisture, and microbiological safety.

04

Packaging — Export-Ready Packs

Vacuum sacks to private-label pouches, sealed to preserve freshness from our floor to your customer's hands.

05

Export — Global Delivery

We manage documentation, phytosanitary certificates, and freight coordination to over 40 destination markets.
